DETAILED ACTION

EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

Applicant's amendments to the claims filed November 23, 2009 has been fully considered. In light of the Applicant's amendments, claims 85-91 are allowed and renumbered to claims 1-7.

In light of the amendments to the claims the 35 USC 112, first paragraph rejection over claims 31-55, 40-44 and 84 is withdrawn.

The following is an examiner's statement of reasons for allowance: The claims 85-91 are drawn to a method of cosmetic care for obtaining slimming effect on the human body, comprising topically delivering a compositions comprising phytosphingosine and forskolin. There is no prior art disclosing the applicant's combination that provides a "slimming effect". Both phytosphingosine and enzyme adenylate cyclase compounds from plant extracts are known to provide anti-aging effects as taught by Jackson et al. (US 5,578,641) and Andre et al. (US 5,709,864). Further, Bombardelli et al. (US 5,679,358) teach that adenylate cyclase stimulators such as forskolin reduce the deposits of superfluous fat (see abstract), but Jackson et al. teach that

phytosphingosine increases the level of the lipid materials in the stratum corneum in the skin (see column 1, lines 5-10 and column 3, lines 40-43). Nevertheless, the specific combination is not taught to provide a "slimming effect". The specification provides enablement by showing that the combination of an extract of Coleus (i.e. containing forskolin) and phytosphingosine lead to a massive and visible decrease in lipid droplets which are less numerous and of smaller size (see page 20, figure 6).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
